

Nerve, muscle and bone integration

Musculoskeletal therapy's approach to

Detecting faulty nerve circuits and

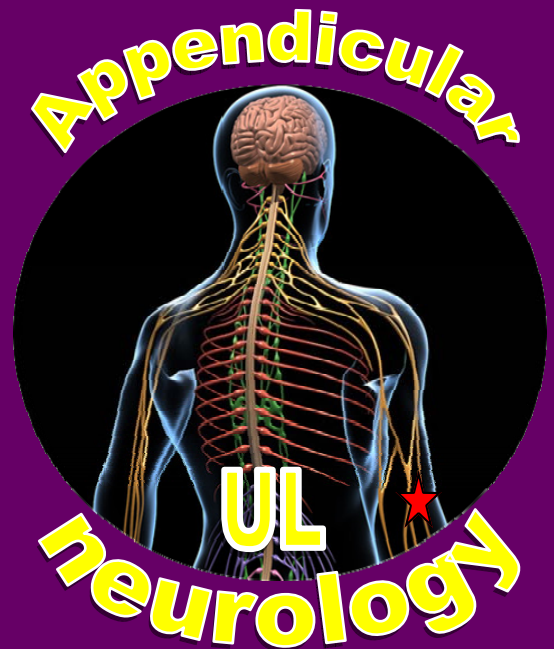

become like an electrician of the human body

NEUROLOGY OF THE UPPER LIMBS

Quick and accurate neural tension tests to reveal conditions such as tennis elbow, carpal, cubital and radial tunnel syndromes, the problems generated by Guyan's canal and other hand and wrist nerve compressions.

We will be providing you with skills in conducting neural tension tests to the median, ulnar and radial nerves

Successful treatment methods demonstrated including stripping, cross fibre, trigger points muscle activation and fascial stretching.

This first neurology workshop focuses on a wide variety of nerve issues of the upper limbs
